Wake up baby it's time to leave
We got plans and we got dreams
We got a long way to go
Pack up all of your emotions
All your faith and devotion
We're gonna need it this I know

If you're at the edge of the past
Our future's unfolding fast
baby don't look back

(Chorus)

We're goin to a new frontier
Wide open without fear
I walk this winding road
With you into the great unknown

We're going to a new frontier
Let's trust our love will lead us
Right where we belong
And walk on

And i can't wait to get outta here
The wind is up anf the path is clear
For the first time in my life
Our destination don't concern me
more and more i'm longing
it's the journey, it's the ride

Everything is within our grasp
When we have the courage to ask
And we don't look back
Don't look back

(Chorus)

We're goin to a new frontier
Wide open without fear

I walk this winding road
With you into the great unknown

We're going to a new frontier
Let's trust our love will lead us
Right where we belong
And walk on
Walk on

I know there's no confusion
When my heart is movin'
I know it's true
I know it's true

(Chorus)

We're goin to a new frontier
Wide open without fear
I walk this winding road
With you into the great unknown

We're going to a new frontier
Let's trust our love will lead us
Right where we belong
And walk on (Into the New Frontier)

(we're goin to a new frontier)

Wide open without fear

(we're goin to a new frontier)

I walk this winding road

(wide open without fear)

With you into the great unknown

(we're goin to a new frontier)

The wind is up and the path is clear

(we're goin to a new frontier)
