They say that music calms the savage beast
And helps a heartache settle down
That's what I need tonight to sooth me
And dull her memory when it comes around

Tipjars and teardrops
Sad songs for lonely hearts
A temporary cure for the blues I got
I get loose when I hear guitars but then the music stops
And all that's left is tipjars and teardrops

She used to fill my heart with melody
Lovin' words I'd never heard before
Now without her I'm in quiet misery
And I can't take this silence anymore

Chorus

I get loose when I hear guitars but then the music stops
And all that's left is tipjars and teardrops
