I'm walking through the silence
You don't know how it feels
You just see the violence
And walk through the streets
Come and follow my voice
I show you how it is
To live in my world
How incredible it is

To be here
And feel no fear
Walk through silence
Don't soak up violence

I try to open a new gate
For the people who walked alone
Just hope they find a new way
Maybe a little home

You just have to open your eyes
And forget the past
Look to the future

To be here
And feel no fear
Walk through silence
Don't soak up violence

You're not alone
Just come to me and I show you how I live in my sweet
home
Why do you fear?
You do not disappear!
I show you my world and how it is
To be here
And feel no fear

Be here
And feel no fear
