*[Lord have Mercy]*

As we approach the current time frame of 1997. With approximately two and a half years before the year two thousand. Repeatedly it has been reported that there will be a time soon approaching. That major disaster will be striking, all levels of existence. It has also been reported that this disastrous thing will be approaching in the form of many, many as in squad, squad as in Flipmode squad. It has also been reported that everyone out of the many will strike, but this particular motherfucker will strike with an unmeasurable blast and fuck up everything within his 360o radius. Warning. Prepare yourselves. Store your food, stamp your paper, because when this motherfucker gets here, it's about to get real fucked for everyone and everything, everywhere!!!!
