You You, Like it wont  
Through me, me that wont heal

No nothing hits me like you do  
When it's all you are

(right)

Try Try, but you wont find  
Your witness to my crime

No nothing cuts me like you do  
When it's all your fault

Its you, just you and me, oh yeah  
Its true, it's just you, and me unfortunately

Lie Lie, but you wont hide  
The true true, no it's not like you

No nothing hurts me like you do  
When it's all you got

Its you, just you, and me oh yeah  
Its true, it's just you, and me unfortunately

Why u do the things that you do oh what u doing to me

'Cause it's like you don't care, no you don't care, so you  
don't care, about me, what's new?

Its just you, it's just you

All a circus

Make it stop make it stop make it stop.
