You captured my heart, then I found my self mistaken
My heart just fell apart, and now it's just broken.
I were the only one, that wanted to feel
"Is he a lie, or is he real"

You left me all alone
No calls, or messages on my telephone

[CHORUS]

I just want to scream and put my hands up high
Birds come and take me learn me how to fly
Someday I will reach up to you
That I'm saying now, it's true

Sometimes I wish, that I could be another person
You're the reason why.
You felt so wrong, when I told you about my feelings
You couldn't say the same, cause you never actually
felt it.

Alone all the time
Whatever, I'm just doing fine

[CHORUS]

I just want to scream and put my hands up high
Birds come and take me learn me how to fly
Someday I will reach up to you
That I'm saying now, it's true

Solo?

[CHORUS]

I just want to scream and put my hands up high
Birds come and take me learn me how to fly
Someday I will reach up to you
That I'm saying now, it's true
