All you want me to say
Is handwritten probably because it's wise
And I've screwed it all up even though
we've been over this several times
I'm sticking my blunt nails into your back as hard as I
can but
still I fall
I gave you hell
You gave me heaven
I gave you hell
And what you gave them looked more like
Another fake attempt to have someone smile
even though the idea itself might be wise
This practical joke is not to be taken anyway anyhow
I've never seen a single porno film in my life
