You conduct my inner dreams
We've been here living in our own little worlds.
Try and poison my mind
You look down on me.
You can't even walk the line you say you walk
Not even a little bit who do you think
You are and I've been waiting
Here for so fucking long
I've been waiting
Here for way too long
Your a liar don't forget
I am the one
Who sees the lies
From your fucking face
So you put your head down YET again
You don't even know the things I have seen
Spread apart from the inside out
I know they Exist
You'll never know OH.
God isn't helping me
God isn't saving you or me.
Wait for the reptilians.
