Burn The flag  
And send the ships  
To the sea, this is to a time  
Where I thought I was right.  
What's around you and see  
Reality in the future  
Your hands tend to shake  
And the earth tends to quake

Blurred times and fairytale rhymes  
That day will come were my mind detaches  
And everything collapses  
What's around comes home forever  
I won't be oh  
And whens it over your head is up in a cloud of smoke  
And it's filled with false hopes  
What have you done  
What have you done  
What have you done  
I have been burning it down burned alive  
I have been burned alive I have said my prayers
