What makes it wants to die
You cry
I ready to start

Repel them all in this disease
Take the fire won't breakthrough your force
It hold most everything
Forget my hopes
Forget my dream
This our chance to make you cry
I almost take it back

Please stop away it's time to breath
Don't waste your breath
Don't waste

Still I had
Time I have to go
Just want to lay
I ready to start
I ready to start

Taste everything about war
Sword
Fuck
Taste everything about war
No
War
That's everything about war
