

Call It A Night "On Green We Go"

Visit "[On Green We Go](#)" on MotoLyrics.com

Call out to Jersey can you hear me?
I've been dreaming on the east coast
From the passenger from the passenger seat
We've got this cooler stacked well find some friends
You won't catch us looking back
Grab your friends come on just dance

On green we go, we might never make it home (hey)
Remember this face, were gonna take it all the way
I hope you know, we might never make it home (hey)
Remember this face, were gonna take it all the way

So what if I find comfort in every single crowd
Where these kids don't know my name
And they don't care what I'm about
The streets are calling out and now we've got just one
more chance
To make this count to make this last
Cause this could all be gone so fast

On green we go we might never make it home (hey)
Remember this face were gonna take it all the way
I hope you know we might never make it home (hey)
Remember this face were gonna take it all the way

We came we saw we called you out
We saw the faces in the crowd
It's up to you now, so let's put it down
We came we saw we called you out
We saw the faces in the crowd
It's up to you now so let's put it down

On green we go we might never make it home (hey)
Remember this face were gonna take it all the way
I hope you know we might never make it home (hey)
Remember this face were gonna take it all the way
Just take, take, it all the way
Just take, take, it all the way yeah
