A day rushes by, in a matter of minutes wasted on only
the most simple things. We can't seem to get it right,
no we can't seem to get it right. Yeah

Talk, talk slower kid, take a breath and see what you've
been missing. I've heard it's worth the wait and the best
has yet to crumble, I've heard it worth the wait and the
best has yet to crumble.

You promised that this was just the start if I promise I
won't let go but I'm, Slip slipping and you, you're
missing my every intention locked in lips that whisper,
that whisper

Talk ,talk slower kid, take a breath and see what you've
been missing. I've heard It's worth the wait and they
best has yet to crumble, I've heard its worth the wait
and the best has yet to crumble.

We were safe in summer.

(Oh it's become so contagious someone save us
someone save us erase my name right from your wrist
you've had your fix you've had your fix)
