You let your friends down.
You let your family down.
You turned your back on us all.
You let your friends down.
You let your family down.
You turned your back on us all.

You cannot run and hide.
We will always be here.
You turned your back, then you broke down.
You cannot run and hide.
We will always be here.
You turned your back, then you broke down.

You broke down. 4x

Your life is not your own.
Your life is not your own.

You let your friends down.
You let your family down.
You turned your back on us all.

You cannot run and hide from what you know is right.
You turned your back.

Your life is not your own.
Your life is not your own.
