"Son Of The Damned"

Visit "[Son Of The Damned](#)" on MotoLyrics.com

I was born in the light of a fullmoon
And baptised in the sacred blood of an angel
Raped the holy deity and slayed a new born child
I ride the wings of darkness and evil

I am the Son Of The Damned and the wild
I lacerate your body I slit and tear your flesh
I got you in my vicious circle and poison your last
breath
I make the damned earth quiver I make the heaven
burn
I live in sin and lust and await lord Satan's Return...

In the blackened sky of twilight the Wind of Mayhem
blow
Infernal lightning the sound of thunder roll
Endless nights on fire the Holocaust is near
Mist surround your destiny and the mortals runs with
fear
