Birds are singing their favorite songs
They know just where they belong
I dream of morning in the sun

Thunderstorms empty the sky
While lightning fills my eyes
I dream of a downpour in the night

Could I tell you
You're all I need?
Could I tell you
Before we even meet?
This love is more than I've

Ever felt before

Hollywood romance is sweet
A perfect fit for a screen
I dream of a love that isn't seen

All the words inside of me
Can't complete this melody
I dream of sharing everything

Please, wait for me
Oh, please, wait for me
I'll be by your side
