And I push my lips against your lips  
I slowly move down to your hips  
And I'll try not to lose my hold  
Girl try not to lose your grip

And I push my lips against your lips  
I slowly move down to your hips  
And I'll try not to lose my hold  
Girl try not to lose your grip

[Chorus]  
And I'm taking over, taking over  
You can try to slow me down but you can never stop me  
now  
And I'm taking over taking  
Cos girl when your with me you can be more then you'll  
ever be

They say they thought you were an angel  
But tonight girl you're playing the devil  
Your temptation hit my eyes  
And she went down both knees and she took it to  
another I-level

[Chorus]

I know you fell in love x2  
And in the next five seconds it will be!  
Me on top of you or you on top of me  
It will be, it will be, it will be good!  
Me on top of you or you on top of me  
It will be, it will be, it will be good!

[Chorus]
