"Fuck You Forever"

You can't hurt me anymore
You won't lie to me with your words
You can't break my heart again
I'll forget your fucking face
Chain me to you
I was chained to hell
You can't beat me anymore
You can't play with my self-esteem
You can't steal my dreams again
All my friends are by my side
Wherever I go
You will not hurt me
I will live without you in misery
'Cause I broke my promise to start again
I will live without you forever free
You will not take my dreams again

Time will take away my wounds
Hope is born to me again
Time will take my suffering
Time will make my dreams come true
I'll get my life
Away from you

FUCK!
Never again... NEVER!

I will live without you in misery
'Cause I broke my promise to start again
I will live without you forever free
You will not take my dreams again
