[Incomprehensible]
St. Vitus dance

Back in the good old days when dancing meant
exploding
The idea was simple for a decent overloading
And for a multiple flash with no chords attached
He came up with a more remote flash trigger

It's connected to an accessory to his hip
Which automatically fires in perfect synchro
But perhaps his most exciting development
Is his angle

They call it the dance
It's the St. Vitus dance
Such flexibility
What an accessory

See his soft bounce
What flexibility
Such a soft bounce
What an accessory

All away, yeah

And for special effects he has six filters
Three colored red with the others pilfered
And if you really wanna know what that means
He could throw a blue flash from eighty five feet

Of course, you might want to check your own output
So we devised a few simple and easy to crack
contortions
So you can bump and scrape
Bump and scrape all the day through

With the St. Vitus dance
St. Vitus dance
Such flexibility
What an accessory

Such that you're soft bounce
What flexibility
She has soft bounce
What an accessory

Check his hot shoe
Feel his output
Check his hot shoe
Feel his output
