It's been so long I heard that song
It made me sweat when I sang along
And even after all this time (?) passed by
It hits me like a rock
And I still don't know why
Take me on your (?), I go
Run with you through the (?)
We don't care for wha'ts wrong and what's not
I like to be with you and all of you (?)
But then you say we always lose our edge
But baby baby, is that too bad?
You know I like you a lot but
It still hits me like a rock (x4)
It's been so long since I heard that song
It made me cum when I sang along
And even after all this time we've passed by
It hits like a rock
And I still don't know why
You took with (?)
You (?) my brain, a million times
We have too many bruises, from too much kissing
And the only pain would be from too much missing
But then you say we always lose our edge
Baby baby, is that too bad?
You know I like you a lot but
It still hits me like a rock (x4)
Hits me like a rock
It's been so long I heard that song
It made me slept all night long
Still, after all this time
Hits me like a rock and I don't know why
Then you said we always lose our edge
But baby baby, is that too bad?
You know I like you a lot but...
Rock, rock, rock
Hits me like a rock (x6)
