It's been so long I heard that song
It made me sweat when I sing along
And even after all this time that went past by
It hits me like a rock and I still don't know why

Take me on your motorcycle
Run with you through the hills
We don't care for what's wrong and what's not
I like to be with you without a feel of what's real

But then you say we always lose our edge
But baby, baby, is that too bad
You know I like you a lot but
It still hits me like a rock (x4)

It's been so long since I heard that song
It made me come when I sang along
And even after all this time we've passed by
It hits like a rock and I still don't know why

You told me if we ever collide again
You would melt my brain a million times
We've have too many bruises from too much kissing
And the only pain would be from too much missing

But then you say we always lose our edge
But baby, baby, is that too bad
You know I like you a lot but
It still hits me like a rock (x4)

Hits me like a rock
It's been so long I heard that song
It made me sweat all night long
Still after all this time
Hits me like a rock and I don't know why
Then you said we always lose our edge
But baby, baby, is that too bad
You know I like you a lot but
Rock, rock, rock, hits me like a rock (x6)
