CHRORUSx2

If only you knew
how much i do
do love you

I never really had the chance mija to show that i cared.
If I could see you once then you'd know i'd be there
i dont really know what happened. why we broke things
off

Maybe it happened to fast when we started it off
All i know is that i miss you I don't see you no more
And when i'm hittin your cell you don't answer no more
And i dont even remember what we fightin for
So just out of no where we aint tight no more
Now everything around me aint right no more
Mama everything is dark there aint light no more
Still think a whole lot about you mama wonderin what
you doin
wonderin what you think about look at what im losin
Maybe you just scared cus im always on the road
but id give it all up just to chill wit you yo
And i dont think you realize how much this fucks me up
So heres a rola for you mija just to say whats up

CHORUSx2

Yea and on the reals though i was up to settle down
probably the most sincere soul that ive been around
i aint ever been the type for all the serious shit
but when i met you i was game now im missin that shit
you aint ever did me wrong and always showed me
respect
in that short time we spent i will never forget
one of the few that i trusted enough to get near with
type of ruka i could just kick back and drink beer with
Hope you know this song is for you when you hear it
still got a place in my heart your always in spirit
now im back on my feet now it wasnt that easy
alot of cases of corona mija believe me
alot of days have come and gone and with time all
heals

but i think these wounds are permanent theyll never
heal
cus without you in my vida the world aint real
and i aint the same when you aint here

CHORUSx2

All this time that youve been dissin me aint even missin
me
sendin me flowers and shit but you werent listening
not much i can say guess i got to move on
get on with my hustle suck it up n be strong
Girl i hope you know i miss you
you just dont know how much
maybe sometime when your lonely youll get in touch
and when the vato that your runnin with fucks you
around
call me up ill be there to pick you up off the ground
not much with me happenin just writin and rappin
still hittin them stages for major wages
wished you were here with me seein all these places
over seas tours spendin president faces
your place in my heart cant no one replace it
not havin you around me yea i hates it
your the only one to take my heart and brake it
the smile on my face aint real i just fake it
