Here we go again, baby
On the New Electric Ride
Twisting and turning
Over on our side
Here we go around the curve
Ya, we really going to swerve
Oh, I could barely hold my pride
I could barely hold my pride

Rappin' so hard I'm holding my side
With you right by my side
With my baby right by my side
When the machine-guitar starts to playing
We're watching the shooting stars
We're under love's blue sky
On the New Electric Ride

Think of all the love we've been missing
Then we start to kissing and kissing
I could barely hold my pride
With my baby right by my side
Loop-de-loop,
Ride and glide
Swoop-de-swoop,
On the New Electric Ride

With my baby right by my side
I can barely hold my pride
>From coast to coast
She loves me the most
Twisting and turning, side by side
My baby loves to hide
On the New Electric Ride
Up and down, around and round
She loves me the most
On the New Electric Ride
Up and down, around and round
She loves to hide
On the New Electric Ride . . .
