I'm losin track of time
But it's still movin' by
With no control of it
Just seems so hard to leave
This part supposed to be
The easiest thing
(Oh no)

I don't know
Where to go
But I know this (but I know this)
I can't stay
Here no more
I got to leave
(Whoa whoa)

I've been searching to find
Find me a way out of here
I've been searching it blind
But deep in my mind I see it clear
The route to take me from of this, turn left, keep
straight, make a right
Trying to find a way out of here
There's got to be a way

I got a not to guide
Me to the place that I
Thought I would never find (thought I would never find)
But it's somewhere not far
Cuz it's right in my heart
That need a hold tight

I don't know (I don't know)
Where to go
But I know this (but I know this)
I can't stay
Here no more
I got to leave
(Whoa whoa)

I've been searching to find
Find me a way out of here

I've been searching it blind
But deep in my mind I see it clear
The route to take me from of this, turn left, keep
straight, make a right
Trying to find a way out of here
There's got to be a way

When no problems I face
Won't go away
Still I stand strong
When no precious to mind
I would stand up and brush it off

I've been searching to find
Find me a way out of here
I've been searching it blind
But deep in my mind I see it clear
The route to take me from of this, turn left, keep
straight, make a right
Trying to find a way out of here
There's got to be a way

I've been searching to find
Find me a way out of here
I've been searching it blind
But deep in my mind I see it clear
The route to take me from of this, turn left, keep
straight, make a right
Trying to find a way out of here
There's got to be a way
