It's just my imagination a sort of empty  
Concentration,

While I fiddle with my fingers  
And take a sip of luke warm tea

Lets walk  
Lightly to the infectious rhythm of the cool  
Bossa-nova

And myriad puzzle pieces are  
Here for me  
That's right, right, right I was  
In the same place just last week and I  
Ought to know

The only things changed  
Are my clothes step by step, your in control,  
Don't be uptight case by case, go ahead and laugh  
Everythings alright

Beyond the countless days and  
Endless night I know she patiently waits just for me  
But... I gotta go my own way
