I should have known all along, there was something
wrong
I just never read between the lines
Then I woke up one day and found you on your way
Leaving nothing but my heart behind

What can I do to make it up to you
Promises don't come easy
But tell me if there's a way to bring you back home to
stay
Well I'd promises anything to you

I've been walkin' around with my head hanging down
Wondrin' what I'm gonna do
'Cause when you walked out that door,
I knew I needed you more
Than to take a chance on losing you
What can I do to make it up to you
Promises don't come easy
You know I've made up my mind to make it work this
time
That's the promise that I give to you
You never thought I loved you
I guess you never thought I cared
I was just too proud to say it out loud
Now I know, to let my feelings go (so tell me)

What can I do to make it up to you
Promises don't come easy
You know I've made up my mind to make it work this
time
That's the promise I can give to you
What can I do to make it up to you
