Ships are flying on the mirror sea
Sails are waving messages at me
White and bright and beautiful is what you are
Shining, waving, smiling at me now

You seem to be like stars in the night
Hanging to guide me in every way
Everyday
You seem to be like stars in the night
You are my guiding star

Waters
Warm now
Summer's in my hair
Happy moments, but I long for the sea
Sailing with you, hanging over me
I'm never lonely when you're smile shines on me

You seem to be like stars in the night
Hanging to guide me in every way
Everyday
You seem to be like stars in the night
You are my guiding star

You seem to be...
You seem to be...
