There's a place that I like  
It comes from within  
And it starts  
When I fall asleep

It's the thing inside you  
That we call consciousness  
And it works eatherway

All I want to do is sub-usual  
Something I can't define  
Can't you feel it?  
Can't you see it?  
Is it something extraordinary?

When I sleep, I am there  
The place no one knows  
It's my world  
Where I fall asleep

And it's great to be there  
'Cause here I am free  
From all the degrading things...

All I want to do...

It's for you, this place of mine  
Behind skies and stars  
When the world falls asleep

All I want to do... (x2)
