### "What About Me"

What about me, what about me  
What about me, what about me

'Cause every word you say  
I find myself mistaken  
Can't you see we're not the perfect combination

'Cause you got what you want  
But I'm the one in need

With every breath I take  
I fake the right impression

On and on and on and it goes...  
On and on and on

Hey what about me (what about me, what about me)  
What about me now (what about me, what about me)  
If you don't like the way I do  
You better leave now

What about me yeah (what about me, what about me)  
What about me now (what about me, what about me)  
I've got nothing left to say  
I'm breaking free now

I'm longing for your touch  
But you don't seem to care  
I need to get away  
And fight this sweet surrender

So heavy on my heart  
You hurt me like no other  
It's killing me inside  
I need to run for cover

On and on and on and it goes...  
On and on and on

Hey what about me (what about me, what about me)

What about me now (what about me, what about me)  
If you don't like the way I do  
You better leave now

What about me yeah (what about me, what about me)  
What about me now (what about me, what about me)  
I've got nothing left to say  
I'm breaking free now

Can you tell me why you had to throw it all away?  
Don't wanna spend another night in desperation

Excuse me? Are you talking to me?

Hey what about me (what about me, what about me)  
What about me now (what about me, what about me)  
If you don't like the way I do  
You better leave now

So what about me yeah (what about me, what about  
me)

What about me now (what about me, what about me)  
I've got nothing left to say  
I'm breaking free now
