Remind me where I left the key last time  
Remind me where I locked my life behind  
In a room, it's in a room

Smash the glass and put the pieces back  
You say your face could cause a heart attack  
It's your doom, it's your doom

When you're down and almost done  
You tell yourself it weighs a ton  
The heavy heavy heart  
You tell your friends your time has come  
And give a piece to everyone  
Your heavy heavy heart

Woebegone and delorious  
Melancholy is glorious  
No more smiles on the face of us  
It's gloom, it's gloom

When you're down and almost done  
You tell yourself it weighs a ton  
The heavy heavy heart  
You tell your friends your time has come  
And give a piece to everyone  
Your heavy heavy heart  
Your heavy heavy heart

Heavy heart  
Your heavy heavy heart

When you're down and almost done  
You tell yourself it weighs a ton  
The heavy heavy heart  
You tell your friends your time has come  
And give a piece to everyone  
Your heavy heavy heart  
Your heavy heavy heart  
Your heavy heavy heart
