Verse 1:

Well it's been a long time since I seen you around
And when was the last time they layed foot in my town
My doors still open and you know the way to my place
And I still spend all night long dreamin about your face

Chorus:

I roll out of bed with you in my head
And I spend my time thinkin about what you said
Wish I knew what I put you through
And I'd love to see you if you wanted to too
But if you don't call it will be ok
Cause I've got a heartache to get me through the lost
days

Verse 2:

My friends have saw you when you were walkin down
main
You been in town three days haven't called I'm goin
insane
But I still remember we'd get high and love all night
But I still wake up alone till the dawning of the light

Chorus

And everything I do just seems so wrong
And you been gone now for so long
And everyone around here thinks we're done
But I still feel the pain and the rising of the sun
