...And when I look back to the ancient  
Afraid of thousand hiding eyes  
I have to run cause they tear my soul apart  
Forgotten remains of the thought  
I've got to...  
Hide- Hide- Hide- Hide  
Run- Run- Run  
Facing the face of degeneration

Hide with me- Sing the song of tears  
Ashes reckon with me the long exhausted  
The long exhausted fire

...And when I run my hopeless path-eternal  
Paved with million hating lies  
I feel that my cosmic dead end can be here  
Becoming stardust, antigen  
I've got to...  
Hide- hide- hide- hide  
Sail- sail- sail  
In non-existing deep levitation

Frozen between space and time  
My still life is to  
Hide- hide- hide- hide  
Weightlessly  
But my still life  
My life's still burden...

...And when I watch my dying terra mater  
Like stellar teardrop in the time  
Dressed in blue silk like a widow of the life  
Only ashes will survive  
Frozen between space and time  
My still life is to  
Fight- fight- fight- fight

...And facing the face of degeneration  
Degenerate!
