

Cassie "Kiss Me"

Visit "[Kiss Me](#)" on MotoLyrics.com

Can I just, just kiss you if it's alright?
Can I do that?

One touch can bring us closer
Don't want this to be over
You know that you complete me
Your love is what I need

Don't rush to see you leaving
Stay with me while I'm sleeping
'Cause you know what you do to me
I'm weak and you know my heart is beating

One, two, three, kiss, that's when I know that we
Four, five, six, kiss, have the right chemistry
You don't have to hold back or be shy
I can feel you want me in your eyes

One, two, three, kiss, that's when I know that we
Four, five, six, kiss, have the right chemistry
Feels so good 'cause I know that you're mine
Boy, I got my eyes closed 'cause you know that I

Love it when you kiss me
Love it when our lips meet
You intoxicate me, I barely can breathe
I love when you kiss me

Love it when you kiss me
Love it when our lips meet
You intoxicate me, I barely can breathe
I love when you kiss me

Ooh girl, I'm coming over
You know I wanna hold ya
Kiss you, 'cause I know you want me too
I want to give you what you'll like

So, so please don't be afraid to
To tell me what'll make you
Reach the top, girl, I'm needing it
'Cause baby, I can feel your heart beating

One, two, three, kiss, that's when I know that we
Four, five, six, kiss, have the right chemistry
You don't have to hold back or be shy
I can feel you want me in your eyes

One, two, three, kiss, that's when I know that we
Four, five, six, kiss, have the right chemistry
Feels so good 'cause I know that you're mine
Boy, I got my eyes closed 'cause you know that I

Love it when you kiss me
Love it when our lips meet
You intoxicate me, I barely can breathe
I love when you kiss me

Love it when you kiss me
Love it when our lips meet
You intoxicate me, I barely can breathe
I love when you kiss me

Ooh, baby, love it when you kiss me
I barely can breathe
Love it when you kiss me

Love it when you kiss me
Love it when our lips meet
You intoxicate me, I barely can breathe
I love when you kiss me

Love it when you kiss me
Love it when our lips meet
You intoxicate me, I barely can breathe
