"Definition Of Fainting"

Visit "[Definition Of Fainting](#)" on MotoLyrics.com

Your fainting is a lack of blood to the brain,
Causing weakness and a heart action followed by pain,
it's in your body, or the atmosphere and there's
growing fear, I'll let you lie down, on the concrete
where you would pass,(where you will)

Ill show just what Im afraid of selfish these lines were
always made up. I'll show just what Im afraid of jealous
these lines were always made up. I'll show just what Im
afraid of selfish these lines were always made up. I'll
show just what Im afraid of jealous these lines were
always made up.

She breaks out, in a cold sweat and the tears,
screaming "Help Me", I can't do this all on my own. it's
too late to, even think about trying forget it. don't you
leave me, she said failing to ignore what she's done.
(What she's done.)

Candle in the window pane, burn a hole in the picture
frame. Candle in the window pane, burn a hole in the
picture frame. (2x)

Ill show just what Im afraid of selfish these lines were
always made up. I'll show just what Im afraid of jealous
these lines were always made up. I'll show just what Im
afraid of selfish these lines were always made up. I'll
show just what Im afraid of jealous these lines were
always made up.
