All that is left is an empty shell  
Of my heart that is crushed  
I don't never wanna see  
What my mind has seen  
When you loved me  
Every night, every night alone with you  
Every night alone now

When she sits on your lap  
Try to pretend to laugh  
When she does stupid things  
Just like i used to do  
Do no hate her  
Don't you even try  
For to leave her is to love her  
The same as you and i  
I love you  
And i miss you too  
I really do love you  
And i really miss you too

But i don't know you  
And i don't need you  
And i don't want you anymore

Every night, every night alone with you  
Every night alone now
