Where we going from here
Well I don't know
It seems we fell down the stairs
We're now below
Do you think that she'll call
My heart says no
Another bridge that has burned
We can't get home
Where we going from here
It brings me down
Where we going from here
The queen's skipped town
Prima Donna in flares
So strong, right on
Ego bigger than fair
Eclipsed the sun
It won't fly the wings are wet with rain
It won't fly and I'm the one to blame
How did I come to be here
This suit is wrong
These aren't my dreams or my fears
I don't belong
Suddenly she appears
But then she's gone
Celestial dollars and tears
We're all alone
It won't fly the wings are wet with rain
It won't fly and I'm the one to blame (Do you
understand)
