I need a love to meet me half the way  
The kind of love that will always stay  
Together, forever with you

Seems like something's in the air, but we can't decide  
Whether to love or leave is a question of pride  
In every motion there's love, it's brought us around  
To the fact reality, there's nothing to see

CHORUS:

You win, I win, we lose  
Cause there's nothing else to choose  
You win, I win, we lose  
Cause there's nothing left between me and you

I can often tell myself the things that I love to hear  
And I can dream of a love that will never be  
But it seems our love is not meant to be  
So tell me what's on your mind to save us both the grief  
Together in the beginning was a difference  
But it seems our love's not meeting half the way  
But who is right is everybody is wrong?  
Sad song that we'll have to sing again and again  
When the next one comes along

CHORUS

I need a love to meet me half the way  
The kind of love that will always stay  
Together, forever with you  
I know that we can really make a change  
All we gotta do is rearrange  
My love, your love, our love
