I think I need to connect
I deleted what's correct
I let it in invisible
Because I saw it visible

I think you are indescribable
I think you were on reliable
I think you are invisible
I think I saw it visible

I think I need to do school now
I need to catch up and I don't know how
I need to get it correct
We rely ourselves with papers now
I deleted it when it is correct and I don't know how

I think you are indescribable
I think you were on reliable
I think you are invisible
I think I saw it visible

I need to drink some water now
My throat is burning and I don't know how
I need to redo it now
I ran a stop sign and I don't know how

I think you are indescribable
I think you were on reliable
I think you are invisible
I think I saw it visible

I think you are indescribable
I think you were on reliable
I think you are invisible
I think I saw it visible

I need to drink some water now
My throat is burning and I don't know how
I need to redo it now
I ran a stop sign and I don't know how

I think you are indescribable

I think you were on reliable
I think you are invisible
I think I saw it visible

I think you are indescribable
I think you were on reliable
I think you are invisible
I think I saw it visible

I need to drink some water now
My throat is burning and I don't know how
I need to redo it now
I ran a stop sign and I don't know how

I think you are reliable
I think you are very reliable
I think you see it now

I think I need to do school now
I need to catch up and I don't know how
I need to get it correct
We rely ourselves with papers now
I deleted it when it is correct and I don't know how

I think you are indescribable
I think you were on reliable
I think you are invisible
I think I saw it visible

I think you are indescribable
I think you were on reliable
I think you are invisible
I think I saw it visible
