Weak human scum, I penetrated your head and cum
I fucked your existence by guzzling digestive juices in
the stomach
Open wounds bashed multiple times
Nymphomaniac bitch living alive this endoscopic
frontal
cranium surgery
Skinned and brutally persecuted female body, feeding
my
sadistic perversity
Gradually interrupt blood flowing with the start of
bowel
evisceration through the anus
True definition of dyspraxia the painful function of
fertilized fetus
Cold knife lacerated your mortal flesh your body is
completely dissected
Disembowelment, several deep cuts with knife
Skull sawed open for examination, your soul is gone,
your
body is mine
I slit your fuckin guts, visual disturbance, carnal
desire
Embalmed autopsy, headless torso, there are no vital
functions
I torn apart your chest without any reverence
My everyday hell turned into your real pain
This is another sodomy, another endless lust of human
butchery
My utopist gory hallucinations, demented psychopathic
emotions
