Throbbing pain pulsed around her fuckin head  
Hammering at her skull, stabbed into her eyes  
Holding a long carving knife in one rotting hand  
Blood spurted and then gushed as the blade slit her  
deep  
Cutting, sawing, and slicing  
Carving mental butchery, screams in melting eyelids  
Hunger carnal butchery awfully burning corpse  
Hammering, at her skull, hunger never satisfied  
Moaning in ecstasy at the prospect of fresh human  
meat  
Limbs were severed, knee cages left  
Several nasty fuckin corpse without even legs to walk  
Awful process of burning corpse blow her brain out,  
back of her brain  
Speechless hordes of the body beneath the broken  
tombstones  
I am beyond this life... brutalized looking for the brains  
to eat... horrified  
Attacked by the large creature... vomited  
Waiting for the worst, leaving behind gore scenery  
Dead nothing can stop that  
Her arms were massive stalks with pieces of muscle  
and tendons exposed  
Head had been completely ripped from body  
Half chewed head, she was so clearly dead  
Dead head, torso had been ripped apart  
Entrails hanging out intestines...  
Other such organs hanging from the bloody jowls...  
The body slumped lifeless despair to inflicted  
Graveyard zombie viscera, soulless walking dead,  
gruesome wet noises of godless sliced remains  
Her child... ripped off cunt  
Maggots roll out of her eyeballs as I watch on entralled  
Her guts held open by surgical clamp  
Innards drying off nicely, dead people hanging from  
ceilings...
