A torture kit enriched by pulverizer manual
Instruments are used to be applied and the genitalia
are totally murdered her below skin
Airing and filling with previously prepared acidic urinal
discharge, a macabre, a visualized corpus leteum, a
dying screaming perversion
Dehumanized extension of septic body
Crepitated mound of viscera
Oriented sick cum, releasing stinky and blood
Oriented sick cum, releasing stinky and blood
Sticking her lignified crepitated dehumanized
extensions... torn apart body
Swallowed with appatite... good apetite
Chemically abresive manner of abortion
Oriented sick cum, releasing stinky and blood
Oriented sick cum, releasing stinky and blood
Anal tissues caused by a harsh endorectal tushe...
disgusting
Swimming and laughing in a gut pool of splattered
organs of zombies
Perforation of muscular tissues cutting the rectal reflex
to make it possible to discharge the extremented shit
blood
Accumulate the apreciated liquid into a bowl to
celebrate
The sardonic utopia of dismembered fetus
