Again I thought about existence  
Sailing through the endless night  
But now I was embraced in darkness  
I was lying in mortal fright+  
Antichrist is thy name+  
I hear the summoning voices  
Calling of shadowed places  
Where I saw his ghastly face  
Thou art I

So let father's will be done  
I stood behind the burning abyss  
Connected in whole, we are the sons  
But our essences are uniform  
Not by mother I was spawned  
From the lava river we were summoned  
By stars promised the end of mankind  
So be it
