Medical research  
Beyond our beliefs  
The purpose of cures  
Immortality I seek  
Encased for the future  
When dead is my disease  
I hatch from my tomb  
New born you must believe

Technology has bred me  
My reawakening has come  
Crionic I breath  
Crionic I breath  
The search for immortality  
All ease to my life  
The endless darkness now opens  
I welcome the touch of light

Cryonic bodies lie deep in wait  
Anaesthetic their burden, the ice now seeps  
Shaken the dead, they rot in the earth  
The promises they missed, they inherit the earth  
Cryonic I breath cryonic, I've become  
The search for immortality, my life has begun

Science advances  
Reasons to believe  
The conquest of fears  
Immortality I seek  
My awaiting now over  
The dead hear my cry  
I reach from my burden  
Born I hear you cry
