Why can't we speak aloud?  
Raise your fists into the sky and shout it now  
Show your priorities  
Tie my lips together now you know I see  
Create atomic designs  
Justified for those who lie but for us a crime

[Chorus:]

This world is numb for your disdain  
We will fail  
Why do you seem so fine when all but hope is gone?  
Free yourself with apathy

How can we still not care?  
Individuality it's now a stare  
Density, feel it grow  
Skin so thick no purity will now break through  
Alienate your mind  
Total global media, resulting dissent

[Chorus]

Detachment of your sense  
Unconscious state of bliss  
Intellect to defect  
This reject, anaesthesia

Shout it now

Your narcotic state  
Leaves us in a wasted land  
Disregard for politics  
Though you understand

Indifference for humanity  
Now consume a brand  
No more time for audacity  
Draconian

[Chorus]
