(1st stanza)

Let the sun refuse to shine  
It won't be long before the days are brighter  
If every steps an uphill climb  
Ooh  
Carry on until they feel much lighter  
For all the clouds up in the sky  
Ooh  
For tears the teardrops in out eyes

(Chorus)

It can only get better  
Be still my heart  
It can only get better  
We've come this far  
It can only get better  
I know it hurts (Ooh)  
For what it's worth  
It can only get better

(2nd Stanza)

If you should ever come away  
Dry the tears and look somewhere above him  
It might be easier to say than to do  
But just pretend that you no longer love him  
When your back's against the ropes  
Ooh  
When you miss someone the most

(Chorus)

Oh! Oh! Oh!  
I know it hurts (Ooh)  
For what it's worth  
It can only get better

It can only get better
