# "Nobody's Singing To Me"

Visit "[Nobody's Singing To Me](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Every time you go  
I'm in the shadows  
Everyday you know  
The pain inside grows

Without you I lose the way  
Fall apart, go insane  
Used to be hiding inside the TV  
Lately that's not really workin for me

No one with anything to say  
Not to me, not to me  
On and on and on  
The days drone

I need a song

What to do  
Tell me what I gotta do  
I can't sustain  
Not the way I'm missing you  
So I turn the radio up  
Looking for a melody  
But nobody's singing to me

It's a blur don't remember what I heard  
You say goodbye now I don't know where to turn  
So I turn the radio up  
Thinking I'm gon 'find relief  
But baby nobody's singing for me

Every night I'm just a victim of the silent  
Nothing there to help  
I tell you love is violent  
Hurts more and more with each day  
If you are asking me  
The price is pain

Use to be that I could call on my DJ  
Tell him what it is that he could play play play  
Play those words, I wanna sing along  
Make me feel, nothing is wrong

What to do  
Tell me what I gotta do  
I can't sustain  
Not the way I'm missing you  
So I turn the radio up  
Looking for a melody  
But nobody's singing to me

It's a blur don't remember what I heard  
You say goodbye now I don't know where to turn  
So I turn the radio up  
Thinking I'm gon' find relief  
But baby nobody's singing for me

One word, to take away this hurt  
Waiting for one dream  
To bring you back to me

I need a song  
What to do  
Tell me what I gotta do  
I can't sustain?  
Now the way I'm missing you  
So I turn the radio up  
Looking for a melody  
But nobody's singing to me

It's a blur don't remember what I heard  
You say goodbye now I don't know where to turn  
So I turn my ipod up  
Thinking I'm gon' find relief  
But baby nobody's singing for me

What to do  
Tell me what I gotta do  
I can't sustain  
Not the way I'm missing you  
So I turn the radio up  
Looking for a melody  
But nobody's singing to me
