"Silenced"

You justify your actions in the name of God

With a fucking trigger

They were just doing their fucking jobs.

You're not solving a problem

You're just creating another

I don't want to involve myself in your fucking ethics

But where the fuck do you get off saying that it's
murder

When you're the one with the fucking guns?

I'm sick of seeing your faces

Go home to your fat wife and dozen kids

Silenced all for what? [x8]
