The Doctor's stuck in the Pandorica,  
Amy might be dead and Rory's a Roman with a gun  
inside his hand -  
Seems like things aren't going as planned

River's in the TARDIS,  
The TARDIS is on fire,  
She's feeling the heat,  
On repeat she'll require,  
Someone she can trust,  
Someone with a bow tie,  
But he's been locked up  
And left to die.

Oh my God what will they do  
Seems impossible to get through,  
My mind is blown I bet yours is too,  
Well I guess this is Doctor Who.

Rory's quite distressed and he starts to sob  
Ahen the Doctor appears with a mop,  
"Get me out of the Pandorica."  
"But you're not in the Pandorica."  
"Yes I am, well, yes I was, it's complicated but I won't  
explain it now because... "  
Then he disappeared into a hazy fuzz,  
That man I can't explain why he does the things he  
does.

Oh my God I don't I don't have a clue  
Whese paradoxes are hard to construe  
My mind is blown I bet yours is too,  
Well I guess this is Doctor Who.

It's the Big Bang Two and I need to review what on  
earth just happened before my eyes.  
Time has gone askew the universe has too  
I'll try to explain to you the Big Bang Two,  
The Big Bang Two.

The Doctor's got River's vortex manipulator,  
Which he'll use to meet Rory 2000 years later

When they meet Amy after her sleep in the box.

They realise the sun is really the exploding TARDIS.  
Doctor saves River from the imitating star.  
This woman watches back can't help but point out the obvious.

Oh my God he's wearing a fez,  
Oh my God he's wearing a fez,  
Oh my God he's wearing a fez,  
Oh my God he's wearing a fez.

A Dalek pops up out of nowhere  
Shoots the Doctor kills him quite unfair  
He jumps back 12 minutes to the stairs,  
He's dead,  
And everyone despairs.

Little do they know the Doctor lies  
He's gone stopping the universes demise.  
Amy says her last goodbyes,  
Doctor flies up into the skies.

The universe is back it's true  
But the Doctors said his final adieu,  
Maybe he'll come back if she remembers you.

It's the Big Bang Two and I need to review What on  
earth just happened before my eyes.  
Time has been renewed the universe has too,  
But Amy still can't help but cry.

Someone's missing, the question's who.  
Then she remembers -  
Something old  
Something new  
Something borrowed,  
Something blue.  
And that's the Big Bang Two.  
I hope it didn't confuse you.
