Forever my girl
You will be forever my girl
Forever my girl
Together forever my love
You'll be forever my girl
Forever my love, my love
I wanna be with you my baby
Forever, wanna be my girl
Your sweet loving drives me crazy
Oh let me into your world
I always have to think of you darling
Just one thing I always knew
There's nothing I want more than your loving
And this time it will come true
You've got to know it girl
You will be forever my love
There's nothing I want more
You will be forever my girl
Forever my girl...
Feelings for you getting really stronger
Much stronger after every night
I'm sure that it will last for longer
I promise I will treat you right
You know we're made to be together
My heart is always telling the truth
I swear you will be my girl forever
No matter if I win or lose
You've got to know it girl...
