"May You Be the Road"

Visit "[May You Be the Road](#)" on MotoLyrics.com

The road we walk is glitter and gold
Some may be a friend and some may be a foe
If I'm coming from the cold, could you be my road

May you be my road, may you be my road

Trouble like a fist in the hand
Beating to the heart of a man
Love is all you need in the end
But you find you get something else

Cause the road we walk is glitter and gold
Some may be a friend and some may be a foe
If I'm coming from the cold, could you be my road

May you be my road, may you be my road

So in life we'll all search for gold

Looking under old skulls and bones
Darling don't you feel so alone
Together we can both build a home

Cause the road we walk is glitter and gold
Some may be a friend and some may be a foe
If I'm coming from the cold, could you be my road

May you be my road, may you be my road

Could you be my road, may you be the road
Could you be my road, may you be my road

May you be the road
