Until we burn back into the sun  
Until we burn, the kids will just want a love song

Popping a collar kicking down the street  
Kick it, kick it, kick it, to the friends you will meet  
Beats the beats move our broken club feet  
On the off beat, in the middle east

The dance one drops like water in the sand  
Drop it drop it drop it like the heat in clubland  
The moves that break, the breaks  
Like break on newsstands  
The time that sifts like sane through my hand

Breaking, breaking, breaking like waves on the sand  
Polar bears on American Bandstand  
Killer killer killer on electric break slide  
Put it back together on a worldwide divide

City punk rocker, rocking like the doesn't try  
With a roots reggae rocker like Lucy in the sky  
We all fall down when the water runs dry  
We all say hello when we all meant goodbye
